Brizo

H2Okinetic Technology is the study of water in motion. And the Vesi and Quiescence Custom Shower Systems are the first to bring this revolutionary technology to market. By controlling water's shape, velocity, and thermal dynamics, they've reinvented the showering experience – creating a warmer, more luxurious spray that blankets the body, giving the feeling of a

High-Flow Shower with half the water.

- Larger water droplets offer a more massaging, showering experience.
 - A dense shower spray offers a more drenching blanket of water coverage.
- Larger water droplets and a dense spray pattern result in a warmer, more constant shower experience.

Crosby & Taylor

WASHABLE PEWTER

A gift of Crosby & Taylor pewter is something to share and to treasure. Made primarily from tin, it originates in the earth and after being cast by hand, finished by hand, and assembled by hand, it develops a value that no factory piece produce. And like fine wine, pewter only grows better with age. It **never requires polishing**, for it develops its own patina – a natural finish, which pewter collectors know and covet.
